

Ready-to-Wear

LOFT

DESIGN

LOFT is entirely made of brushed stainless steel and is exclusively destined to the ready-to-wear merchandising.

The accessories are fitted to an anodized aluminium slot channel (M19) which is fixed at the backside of the panel, showing only a slim and unobtrusive groove.

The use of stainless steel offers many advantages: solidity, sturdiness, durability, and last but not least, 100 % recyclability.

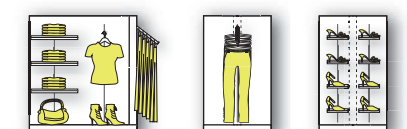

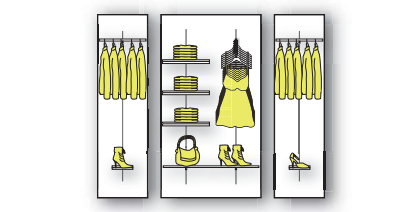

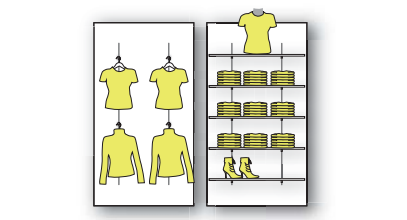

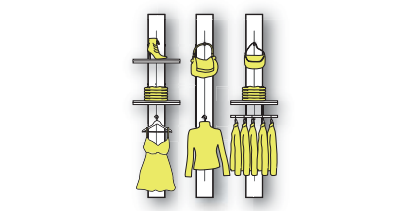

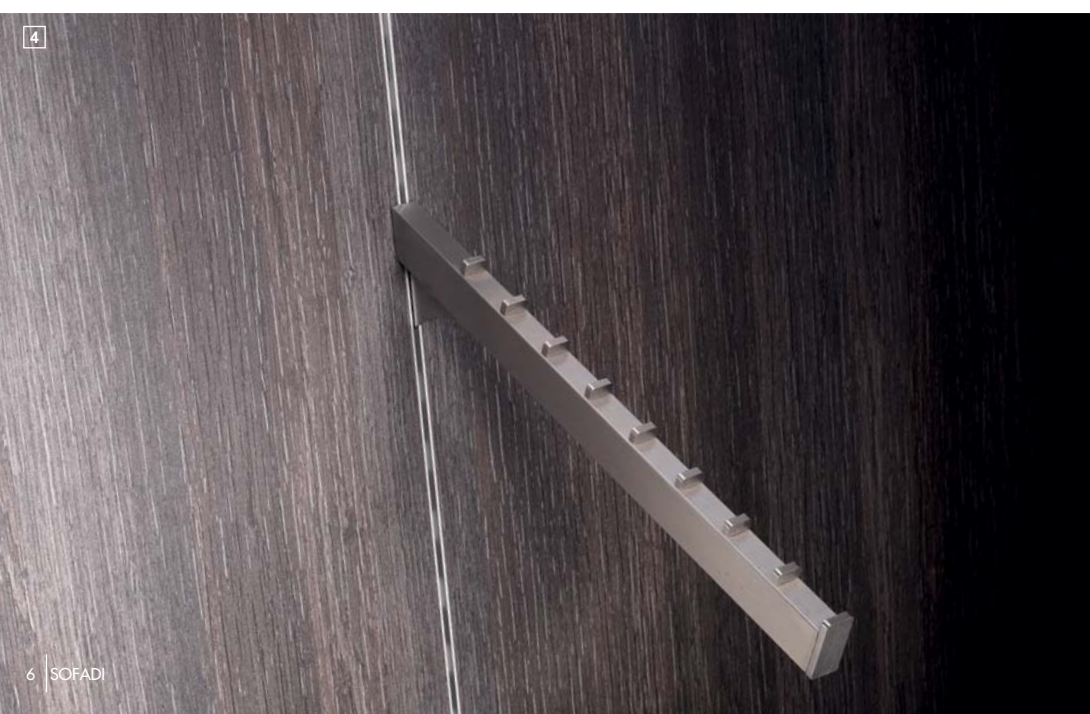

LOOK

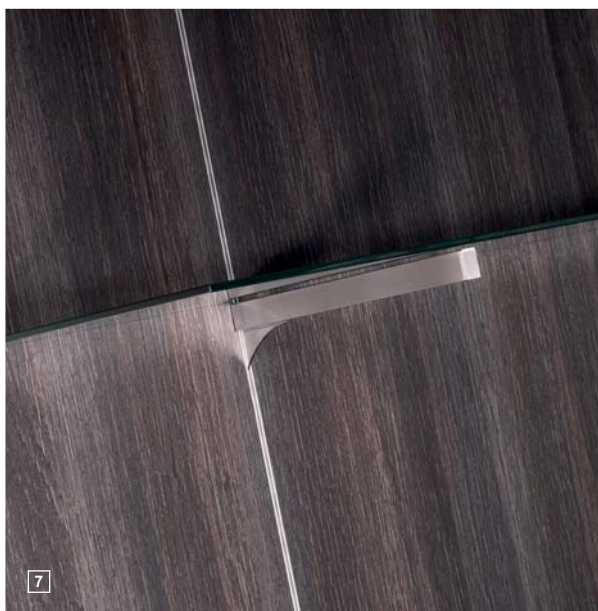

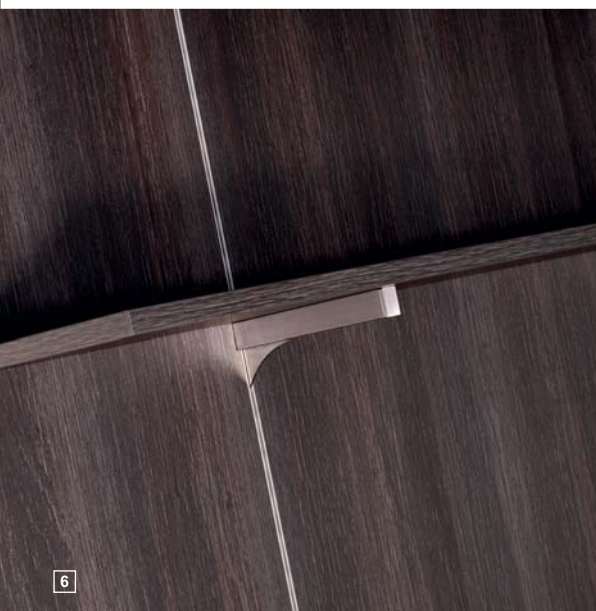

The rectangular lines of the accessories enhance the contemporary and luxurious aspect of the LOFT range. Its genuine aspect, combined with the character of brushed stainless steel, is the mark of high-quality shop design.

The system is composed of 21 different brackets, and covers all the merchandising configurations of the ready-to-wear branch.

- 1 - Straight arms 200 and 300 mm
- 2 - Footwear display
- 3 - T-bracket for glass shelf
- 4 - Sloping arm

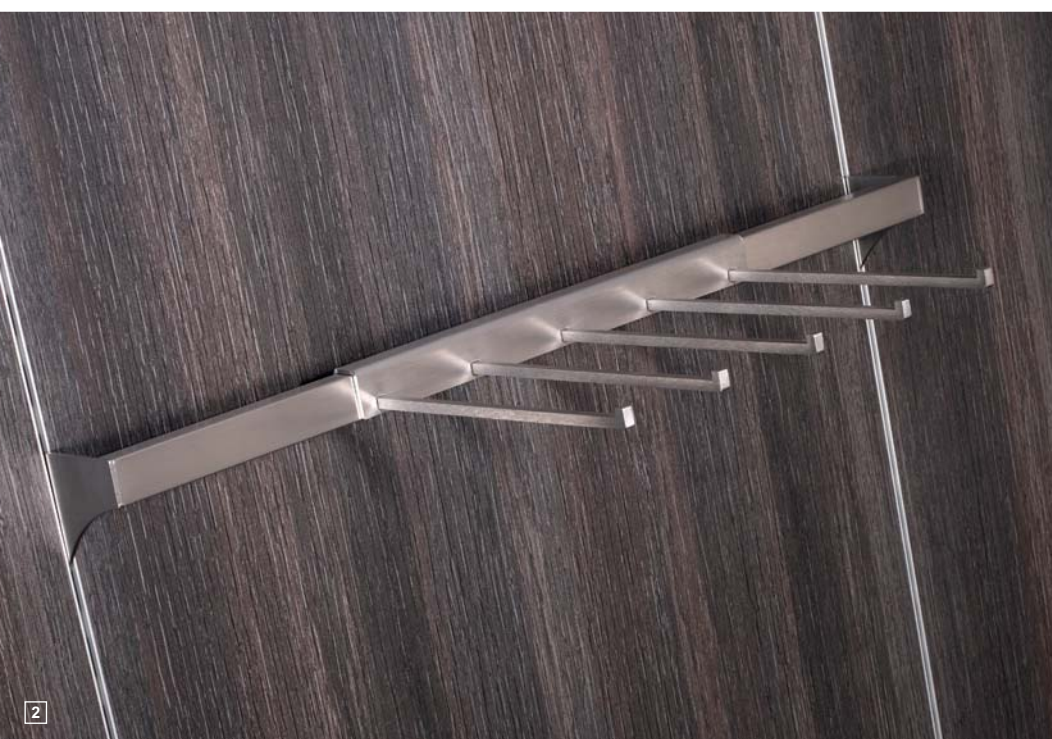

- 5 - T-shaped clothes rail set
- 6 - Bracket for wood shelf
- 7 - Bracket for glass shelf

3

- 1 - Sloping arm and stepped arm
- 2 - Set of square hooks
- 3 - Square hook and blister hook
- 4 - Straight arm

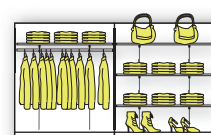

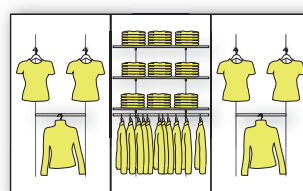

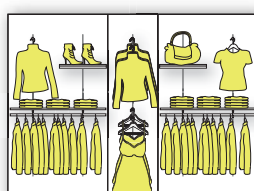

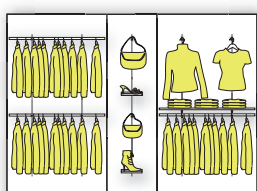

ERGONOMY

The clothes rail bracket is designed for optimal ergonomics. It lets the coat-hanger glide unhindered over the rail, which is fitted out with a welded safety buffer at each end. This way the total available length is usable.

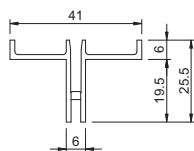

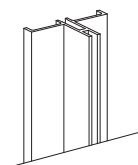

The clothes rail is designed for quick fixing and removal without any tool, while ensuring great stability and perfect squareness. It is compatible with both 600 and 800-mm centre widths.

Folded / side-hung combination

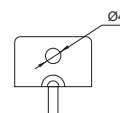

Slot channel sunk from behind

Length: 1532 / 2013 / 2531 mm
